

Environmental Stewardship and Sustainability Committee

2007-2008 Chair: Nicole Moreau ('10)

Description: Expected to maintain communication between the Recycling Committee and the SGA.

Primary Contacts: Michelle Bower

2007-2008 Goals and Accomplishments:

"Recyclemania": A national program to encourage the Mount community to increase the amount of recycling being done on campus. This program helped to lead the push for glass recycling in Patriot Hall.

Increased Recycling around Campus: More recycling bins, recycling at new stadium behind ARCC, glass recycling, and compost recycling

Advice from Prior Chairs: Communication with contacts went well. More student support would have made things go more smoothly as attendance and support are crucial to success. The creation of a Recycling survey in addition to an increased effort to educate the student body are goals to strive for as well.

Executive Board Goals for the 2008-2009 E.S.S.C. Committee : The creation of a glass recycling program on campus would be a great step forward for the committee. The idea of switching the laundry room cycle washers to *cold water only* is an option we would like you to explore with Dean Post.
