

Public Safety Committee

2007-2008 Chairs: Caroline Kenwell ('10) and Sasha Alegbeleye ('09)

Description: Remain active members of the Mount community in the hopes of remaining an easy contact in regards to the Department of Public Safety. Maintain a clear communication line between both student body/faculty/staff, and Public Safety.

Primary Contacts: Director of Public Safety, Barry Titler

2007-2008 Goals and Accomplishments: Identified what needs to be done on this campus in regards to the health and safety of students. New ideas of how the campus could become more involved with Public Safety, as well as Residence Life, are being brought about to ensure this safety.

Advice from Prior Chairs: Getting to understand the campus and their concerns of Public Safety and vice versa went extremely well. The people on this campus have *a lot* to say about what they believe should be done. Everything from parking lots/parking tickets/...all the way to the growing concern of alcohol abuse and its campus wide effect drew response from students. There are many things that could have been done better: meet with Mr. Titler more often, poll the student body to see what they think needs to be done most on this campus, as well as hold meetings for the students to openly converse and interact with Public Safety Officers.

Executive Board Goals for the 2008-2009 Public Safety Committee: We would like the committee to inform us about the security additions that were implemented over the summer. Also, we feel that a survey or poll of the student body would be beneficial to Director Titler in assessing how to proceed with matters of Public Safety throughout campus.
